-Due to the turnout Peter did a tour of the Automotive classrooms, Metal Trades and Wood working classrooms and the Metal trades shops.

Classroom areas were clean and clear of tripping hazards; the metal trades shops have a thick coating of dust that needs to be cleaned. This would need to be done when the classes are not in session. The dust is in the air circulation ducts and thus ends up in offices and classrooms. An air quality complaint was received by Health and Safety the first week of March 2008. This issue was brought up before in the spring of 2005. There are definite health risks, this issue should be a priority.

- First aid reports were incomplete so will be covered at the next meeting

- The next meeting is scheduled for Wednesday April 9th at 12:30 in the Silver King Board room.
