

Selkirk College

Nursing – Bachelor of Science

There is a growing demand for health-care professionals worldwide. With the aging workforce and population, the need for registered nurses is greater than ever. In collaboration with the University of Victoria, Selkirk College offers a Bachelor of Science in Nursing degree. If you are interested in a caring profession with global potential, this program may be for you. This program gives students the valuable knowledge, experience and skills needed upon entering the workforce or pursuing further education.

A CAREER WITH CHOICES

Upon graduation, a BScN degree can open doors to employment opportunities in a much broader spectrum than conventional hospital jobs. Following registration with the CRNBC, graduates are eligible to practice nursing in a variety of settings, or enrol in post-basic nursing specialty programs.

EARN A COMPLETE DEGREE

We are in a degree granting partnership with the University of Victoria and accredited with the Canadian Association of Schools of Nursing. Our emphasis on scholarship and excellence in teaching provides a nationally recognized, shared curriculum. Students in their 3rd and 4th years will be considered University of Victoria students while studying at the Selkirk College Castlegar Campus. Partnerships with other schools makes transferring easy and graduates have the opportunity to apply for and enter directly into master's degree programs in nursing and other disciplines.

LEARNING THAT FITS YOUR NEEDS

Learn in a supportive environment, surrounded by the splendor of the West Kootenay. Small class sizes allow for more individual attention, so you're not lost in the crowd. With several courses available through distance education, you can tailor the program to your specific needs.
