of Selkirk College students  
are satisfied with their  
**transfer experience** to  
other post-secondary  
institutions.\*

“ Although Selkirk is smaller, its courses are as good, and in some ways better, than equivalent courses offered at bigger institutions. Selkirk was able to meet all of my needs as a post-secondary student. All of my credits transferred and I'm happy to say that I felt over-prepared for my third year biochemistry classes! ”

**Matthew Halstead** - 2010 Alumnus

Matthew started at Selkirk College in the School of University Arts and Sciences. He transferred to University of Northern British Columbia (UNBC) where he is currently in his third year of a Biochemistry and Molecular Biology degree. He plans to attend medical school in 2012.

Apply now for September entry.
