

95%

of students are satisfied with the knowledge gained in their studies.*

“ I am extremely satisfied with the education I received at Selkirk! It offered a great combination of theoretical knowledge, technical training and hands-on field work. I truly valued the support and camaraderie that only a smaller institution and class size could provide—the professional and personal connections I made will last a lifetime!” ”

Daris Piper – 2010 Alumna of the Integrated Environmental Planning and Technology program and Project Technician for an Environmental Consulting Company

When researching post-secondary institutions, Daris chose Selkirk's **Integrated Environmental Planning and Technology** program because of its broad course material and potential to provide the skills necessary to work effectively in the environmental industry.

Today, you can find Daris working as a Project Technician for an Environmental Consulting Company that employs more than 5000 people and 1500 contractors. She is responsible for analyzing spatial information and examining lab results of soil samples to facilitate the characterization of reclamation material (soil) for the company's future projects.

Apply now for September entry.
