

97%

of Selkirk College students had a class in which the instructor knew their name.*

“ I’ll never forget the support and encouragement I received when I started at Selkirk. My teachers focused on empowering me with a ‘You can do it’ attitude. I upgraded my math, English, chemistry and biology. My skills and confidence totally developed and doors have really opened up for me. I am succeeding in the Nursing program and LOVING it! ”

Alana Marshall – former student of Adult Basic Education (ABE) and current Nursing student at Selkirk College

At first, Alana was hesitant about going back to school. She was unsure of what awaited her and whether she was ready. However, once she walked through the doors of Selkirk College’s Silver King campus in Nelson, she not only found a comfortable, fun atmosphere, but also a supportive one, where instructors knew her name and truly wanted her to succeed.

After upgrading her prerequisites through **Adult Basic Education**, Alana was accepted into the **Nursing** program at Selkirk. She is proud of her accomplishments and attributes much of her success to the encouragement received from her instructors and classmates.
